

Anderson Falls

Anderson Falls is a 10-foot-high waterslide cascade formed on the Ausable River, and the first waterfall encountered since the two branches of the Ausable River joined forces. The waterfall is named after John Anderson, an early settler, and lumberman. For a time, the village was also called Anderson Falls. In 1812, the town's name changed to Keeseville in honor of Richard Keese, a prominent, local businessman, and has kept that name ever since. To get there: [GPS: 44°30.276'N 73°28.908'W](https://www.google.com/maps/place/44°30.276'N+73°28.908'W) - From Ausable Forks, proceed northeast on Route 9 for ~10.0 miles until you come to Exit 34 of the Adirondack Northway (I-87). From here, continue northeast on Route 9N (Pleasant Street) for 1.1 miles. When you come to Main Street, turn right and head east for less than 0.2 miles. Then turn right onto Front Street and proceed south for 0.1 miles. At Clinton Street, turn right, go 100 feet, and then bear right onto Mill Street and park to your right.

From Exit 33 of the Adirondack Northway (I-87), head north on Routes 9/22 for 4.2 miles. Turn left onto Clinton Street and drive west for 100 feet. You will come to Mill Street. Park to your right.

From the parking area, walk down Mill Street for less than 100 feet to a park that overlooks the falls. The park, including a pavilion and benches, was created in the 1980s and occupies the spot where the R. Prescott & Sons furniture factory once stood until it burned down in 1966.

It is also possible to descend to the level of the streambed following a stone path between two walls.
